TECHNICAL SUPPORT SPECIALIST | IT ADMINISTRATOR

Experienced IT Professional with 10+ years of experience in providing exceptional client support within fast-paced work environments; recognized for developing innovation solutions to technical issues, improving efficiency for both the team and clients, and increasing customer loyalty.

SUMMARY OF QUALIFICATIONS

- 9+ years working remotely within a help desk and customer support environment
- 2 years as Network Operations working with Cisco switches and routers, monitoring the network equipment
- 1 year in DevOps as a build and release engineer to deploy artifacts for testing and dev environments
- 3 months training in core java programming for the Mindtree Campus hiring program

EDUCATION and CERTIFICATIONS

Master in Systems Engineering, Cybersecurity - Embry Riddle Aeronautical University, DATES
Bachelor of Science, Software Development - Western Governors University, DATES

CERTIFICATIONS

Oracle Certified Professional Java SE 6 and SE 7
Comp TIA A+ ce
Comp TIA Security+ce
CIW Web Foundations Associate
CIW Database Design Specialist
Microsoft Technology Associate OS Fundamentals
Microsoft Technology Associate Software Fundamentals
Comp TIA Project +
Comp TIA Network+ ce
CIW Javascript Specialist
CIW Web Design Specialist
CIW Perl Specialist
Microsoft Technology Associate Security Fundamentals

PROFESSIONAL EXPERIENCE

NETWORK OPERATIONS - Enco Electronics, DATES
Provide support for products and services, in-person and remotely; monitor and maintain equipment

- Collaborating with contractors and install teams to get equipment, fiber and access points installed
- Developed a website for local support team providing self-help documents and forms for new installs
- Used Linux to configure our water detection system
- Consult with owner's and HOA's to determine appropriate equipment needed to install
- Constructed digital signage using Ubuntu Server, Microsoft Office and WordPress

Mindtree – Campus Hire Trainee, DATES
Applied Core Java programming and coding object-oriented strategies to complete current projects for clients

- Adapted Agile methodology for continuous delivery for the development lifecycle
- Utilized Eclipse ide for creating major Core Java projects for existing clients
- Developed web applications with the Spring MVC framework using web.xml to render the webpage on a browser.
- Defined stored procedures for database using MySQL to create, delete and add to databases
- Created responsive user interface POC using HTML5, JavaScript, CSS3, jQuery, and AJAX, improving end user experience
- Developed dynamic web applications using JSP to create a connection to the database

Centurylink Technical Support Specialist Level II, DATES
Provided support to high volume of customers and handled their frustration and core issues within a timely manner

- Diffused multiple irate calls and converted them to life-long loyal clients
- Asked probing question to identify the source of the issue rather than identifying the symptoms
- Assisted clients through various levels of troubleshooting while cooperating with management

Name

Active TS/SCI with CI Polygraph

City, UT ⧫ phone number ⧫ email address ⧫ LinkedIn profile/online portfolio

EDUCATION and CERTIFICATION

B.S. Cybersecurity and Network Management, Expected Graduation: DATES

Weber State University, Ogden, UT

A.A.S. Avionic Systems Technology, DATES

Community College of the Air Force, Maxwell AFB, AL

CompTIA Security+, DATES

RELEVANT SCHOOL EXPERIENCE

NET 2210 Linux Systems Administration, DATES

- Learned key skills such as navigating Linux via the command line, configuring shell scripts, file globbing, file manipulation, and managing processes.
- Gained proficiency in finding files, working with regular expressions, and using the vi editor.

CS 3705 Protocol Analysis, DATES

- Analyzed network traffic using Wireshark to study the behavior of protocols such as DNS, TCP, IP, and UDP, identifying patterns of normal and abnormal operation.
- As part of a capstone assignment, created a Kali Linux virtual machine to capture and analyze radiotap data for dB measurement of wireless signals from a home router.
- Presented findings through a detailed presentation outlining the assignment's goals, methodologies, and results. This experience highlighted my skills in network analysis, troubleshooting, and technical communication.

NET 2310 Network Server Administration, DATES

- Established a Windows Server 20XX VM and deployed Active Directory services by following detailed coursework instructions, gaining experience in managing user and group policies. Additionally, set up essential network services such as DHCP, DNS, Windows Deployment Service, a web server, and Windows Server Backup.
- Successfully completed the project by adhering to specified guidelines, demonstrating the ability to learn and apply technical concepts, follow procedures, and meet project requirements within defined timelines.

NET 2415 Cisco TCP/IP Routing Protocols and Router Configuration, DATES

- Gained hands-on experience with configuring routers, switches, VLANs, and IPv4/IPv6 addressing.
- Conducted virtual lab exercises using Cisco's Packet Tracer software to set up and troubleshoot network connections, implement security measures, and ensure network redundancy.

PROFESSIONAL EXPERIENCE

Help Desk, DATES
United States Air Force, Roland R. Wright AFB, UT

- Provide integrated voice, and video services to customers, ensuring seamless communication and connectivity.
- Perform help desk support, including setting up client equipment, mapping network printers, and imaging computers via PXE boot, while delivering responsive technical assistance to end-users.
- Ensure compliance with TEMPEST standards, with no negative findings during the 2024 SCIF accreditation inspection.

F-35 Advanced Aircraft Integrated Avionics Technician, DATES
United States Air Force, Hill AFB, UT

- Maintained avionics systems for a fleet of 26 F-35 aircraft valued at $3.2 billion, ensuring readiness for both training and global operational requirements.
- Diagnosed and resolved pilot-reported discrepancies and aircraft-reported malfunction codes using system theory, fault isolation trees, and schematic diagrams. Verified operational status after implementing corrective measures.
- Inspected and approved aircraft maintenance performed by technicians according to technical publications and directives, ensuring aircraft safety and airworthiness.
- Led a software upgrade on 18 aircraft as a shift lead, coordinating with Lockheed Martin engineers in 20XX. The successful implementation of this upgrade initiated 250 F-35 updates worldwide.

COMSEC Responsible Officer (CRO), DATES
United States Air Force, Hill AFB, UT

- Trained 15 account users on operating procedures, emergency action plans, and administrative requirements for classified materials, covering safeguarding, handling, inventory, and destruction protocols.
- Executed cryptographic key loading, replaced crypto units, and performed troubleshooting and operational checks on aircraft mission systems ensuring secure communications.
- Managed the work center's COMSEC account, achieving an "Excellent" rating in all annual inspections from 20XX to 20XX, reflecting a consistent record of compliance and security.
- Ensured sufficient cryptographic key supply and served as the designated courier for COMSEC materials during a 20XX military deployment to the Republic of Korea, overseeing secure transport and delivery.

SKILLS

SQL	Linux	Training
Java	Windows	Multitasking
Active Directory	Schematic Diagrams	Leadership/Mentoring
Wireshark	Troubleshooting	Teamwork
Cisco Configuration	Inspection	Verbal/Written Communication

WORK EXPERIENCE

EVENTS SET UP MANAGER - *The Monarch, Ogden, UT*, DATES

- Plan various ways to set up floor plan layouts for large amounts of people
- Run the AV booth for events using Microsoft PowerPoint. Along with making sure equipment is working properly
- Developed more efficient means to maintain, store, and transport equipment
- Coordinate and oversee events to ensure all individual and collective segments run smoothly

GRAPHIC DESIGNER - *Ranksey Digital Marketing, West Haven*, UT, DATES

- Create Logos for clients; understanding of layout, design, and typography
- Communicate rapidly with clientele regarding their design specifications and ideas
- Ability to produce projects on tight deadlines
- Organization of projects and physical space around me

YARD SPECIALIST - *Star Nursery, St. George*, UT, DATES

- Used effective and efficient ways of unloading and loading trucks
- Portrayed problem-solving skills by fixing broken drip pipes
- Maintained forklifts. Tracked miles, dates being used, and overall operational efficiency
- Utilized communication skills, and decision making involving current stock and inventory concerns

SALE REPRESENTATIVE - *Aptive Environmental, St. George, UT*, DATES

- Used good communication skills throughout each sales process, listened effectively to customer needs/questions/requests in order to help customize appropriate services
- Knowledgeable about services organization provided; used sales application for customer service contracts
- Generated $46,000 in revenue

Work Experience

COMPANY Month Year – Current

FC Associate – Salt Lake City, UT

- Collaborate effectively on a large scale team to sort high volumes of 18,000 packages per night
- Scans and loads packages strategically and safely into transportation carts in order to ensure efficient movement

COMPANY Month Year – Current

Animal Services Worker – Ogden, UT

- Introduces new, organized platforms for employee communication and planning, and provides training for staff
- Identify programmatic shortcomings; implement and sustain procedural programs to increase efficacy and efficiency
- Currently collaborating with a veterinary medical professional to develop and implement a medication calculation program to solve dosing and medication-specific problems the shelter is facing

COMPANY Month Year – Month Year

Lifesaving and Care Supervisor – Salt Lake City, UT

- Managed day-to-day operations to care and ensure live outcomes for 600 animals across multiple locations
- Created reports utilizing database software, input data and ran reports, designed spreadsheets, and created algorithms to assist with lifesaving decisions

Shelter Support Coordinator – Salt Lake City, UT

- Acted as a liaison between Weber County Animal Services and Best Friends Animal Society to diagnose catalysts of euthanasia decisions made for their annual intake of 4,804 animals and spearheaded programmatic improvements, resulting in resolution of barriers to success and increasing the live outcome rate by 25%
- Recruited by senior management to serve as a mentor to out-of-state shelters to improve their programmatic difficulties, resulting in a highly desirable 74% decrease in intake of new animals within 1 month of visiting the shelter

COMPANY – *Technical Support Specialist – Logan, UT* Month Year – Month Year

- Professionally and effectively identified and solved customers' difficulties with phone, tv, and internet services related to power, networking, and port forwarding, as well as provide upgrades and explanations of services

SOFTWARE DEVELOPER INTERN

An initiative-taking, computer science student with exceptional customer service skills, programming, and problem-solving aptitude; adaptable, works well in both autonomous and team-centric environments.

EDUCATION

BS COMPUTER SCIENCE - Weber State University, Ogden UT - **3.5 GPA,** DATES

SKILLS

Programming: C++, SQL, HTLM5, CSS, Python, JavaScript, Visual Studio, Visual Studio Code Microsoft SQL Server Management Studio,

Additional Skills: 3 + years of sales management, leadership, client support/customer service, and technical writing/communication skills

Projects: Built an interactive website using JavaScript, HTML5, and CSS on VSCode. The project was to display all the assignments throughout the semester in CS2350.

WORK EXPERIENCE

Customer Service Associate – Lowes Home Improvement Month Year – Present

- Manage the inventory on hand to reflect an accurate stock number for accounting
- Deliver exceptional customer service to meet the needs of the customer
- Safe and proper use of power equipment

Package Handler - FedEx Month Year – Month Year

- Awarded *"Package Handler of the Month"* based upon efficiency, speed, and volume metric per trailer
- Package sorting, loading, unloading of trailers in a fast-paced/high-tech environment
- Maintained industry standards for quality and efficiency to increase profit and decrease the time

Missionary - The Church of Jesus Christ of Latter-day Saints (Lima, Peru) Month Year – Month Year

- Introduced new methods of organization increasing efficiency and saving 4 hours per meeting
- Taught, educated, and trained local citizens using Spanish to increase productivity
- Trained and mentored over 40 missionaries to meet and pass our metrics and monthly goals
- Monthly activity development and planning to reach our monthly goals

Assistant Front End Manager - Dick's Fresh Market Month Year – Month Year

- Training of Cashiers and Cashier assistants to ensure exceptional customer care
- Ensuring end-of-day receipts, till, safe, and cash drop were balanced and accurate for daily reports
- Developed a new system for management of policy and procedures for cash handlers which increase productivity and reduced money loss by 50

ONLINE PORTFOLIO

SUMMARY of QUALIFICATIONS

Experience: Two years of professional experience in Computer Science related fields, including developing computer-based training courses and internal applications, web application development and troubleshooting, and helpdesk tasks.

Leadership: Four years of experience in a leadership role, supervising multiple 10+ person teams of Aircraft Mechanics, and a team of 4 developers. As a team lead my experience includes training new technicians, delegating tasks to team members, and ensuring manning for proper all tasks assigned.

Operating Systems: Windows 7, Windows 10, OS X

Software: Microsoft Visual Studio, NetBeans, Adobe Suite, Adobe Captivate, Microsoft Office 2016, Microsoft SQL Server

Programming: Java, C#, Python, HTML, HTML5, CSS3, JavaScript, XML, ActionScript 3 and some experience with C++, PowerShell, SQL, and popular design methodologies

Other: Ability to learn new technologies quickly, Secret Security Clearance - U.S. Government

EXPERIENCE

Software Developer, **United States Air Force,** Hill Air Force Base, Utah, DATES

- Developed computer-based training courses for multiple agencies within the United States Air Force utilizing an MVC framework with ActionScript 3.0 and XML
- Converted aircraft marshalling computer-based training course from ActionScript 2.0 to ActionScript 3.0
- Developed program with C# to ensure course packaging uniformity which ensured XML and HTML documents needed for web deployment of the courses were properly written; also created folder structure needed for the package and imported all files needed for interaction with the course tracking database
- Developed an XML writer in C# to search folders for files that needed to be loaded into a training course and write the XML file needed for this
- Developed a program utilizing Java and its GUI component Java FX to interface with the internet and search specific websites for a food recipe based on given title & print the recipe out in user-friendly and readable way
- Maintained HTML5/JavaScript web player for training courses
- Utilized Adobe Captivate to develop multiple training courses

C-130 Aircraft Maintainer, **United States Air Force,** Dyess Air Force Base, Texas, DATES

- Led five-man team to troubleshoot and fix landing gear issue on multi-million-dollar aircraft
- Supervised crew of 10 people in removal and replacement of multiple faulty parts in aircraft flight controls, preventing emergencies during flight

SUMMARY

Detail-oriented and adaptable Computer Science student with experience in full-stack software engineering, cybersecurity tools, and DevSecOps practices. Proven ability to work in Agile environments and deliver secure, scalable solutions. Strong communicator and team player with a government security clearance.

SKILLS

Languages: TypeScript, JavaScript, Python, C++, SQL, C#
Technologies: React, Node.js, PostgreSQL, Git, Docker, Security Onion
Tools & Practices: Agile, DevSecOps, GitLab CI/CD, SSL/TLS Cert Management, Linux, DISA STIG

EDUCATION

Computer Science
Weber State University, Ogden, UT

- Bachelor of Science in CS (In Progress) — Expected Aug 20XX
- Associate of Applied Science in CS (GPA 4.0) — Aug 20XX
- Programming Essentials Certificate (GPA 4.0) — Apr 20XX

PROFESSIONAL EXPERIENCE

Software Engineering Intern | Cyber Security Intern DATES
US Air Force 309th SWEG/MXDES, Hill AFB, UT

- Obtained and maintained an active security clearance.
- Developed a full-stack SBOM viewer web application using PostgreSQL, React, and TypeScript.
- Completed Agile development, C++ programming, and onboarding acculturation training.
- Secured 1st place in team-based code-a-thon challenge.
- Installed and configured a Security Onion server; integrated 23 Elastic Agent endpoints.
- Contributed to the migration of a GitLab repository to an on-premises private instance.
- Generated and signed SSL certificates for internal private server infrastructure.
- Implemented DISA STIGs to harden a RHEL-based GitLab server to meet DoD security standards.

PROJECTS

- **NowPlaying – Android App**
  Developed a Java-based mobile app that connects to a public movie API, allowing users to search for movies and manage personal watchlists.
- **Inventory Tracker – Full-Stack Web App**
  Collaborated on a React and TypeScript web application with a MySQL backend to help users conduct room-level audits of tech inventory.
- **LMS Clone – ASP.NET Web App**
  Built a Canvas-style learning management system as a team using ASP.NET Core and C#, supporting user roles, courses, and assignments.

Software & Web Developer │Computer Science Student

Versatile Software and Web Developer with 4+ years of experience building and deploying full stack using React, Django, MySQL, and other web technologies. Adept at crafting innovative solutions and creating scalable applications in Agile environments. Strong foundation in programming languages, including Java, C#, and Python, with a passion for mentoring and helping others learn how to problem solve. Fluent in Spanish

Technical Projects

- C# Math Game for Kids
- Java Course Planner Application
- PHP/MySQL e-commerce Website
- Django/Python Car Maintenance App
- React Quote Generator
- React Recipe Book
- Senior Capstone (MERN Stack)

Skills & Abilities

- JavaScript, Python, Java, C#, HTML/CSS, PHP
- React, Vue, Bootstrap, Tailwind
- Django, Express, Node.js, MySQL, Firebase
- Git/GitHub, Microsoft Teams, Trello, WordPress
- Agile/Scrum, Team Collaboration, Bilingual (Spanish), Time Management, Problem Solving

Education and Certifications

Bachelor of Science, Computer Science – Weber State University, Ogden, UT, *Expected August 20XX*
Certificate of Proficiency, CSIS Software Development – Salt Lake Community College, *May 20XX*
Associate of Science, Computer Science – Salt Lake Community College, SLC, UT, *May 20XX*

Professional Experience

Web Development Trainer, Salt Lake Community College, SLC, UT, *January 20XX - Present*
Instruct groups of 5-8 students in front-end and back-end development, covering HTML, CSS, JavaScript, PHP, MySQL, WordPress, and UI/UX design principles

- Deliver both in-person and remote instruction with an emphasis on hands-on, project-based learning
- Continuously revise and enhance the curriculum to align with current industry standards, improving student comprehension of technical skills

IT Lab Aide, Salt Lake Community College, SLC, UT, *January 20XX - Present*
Support remote and in-person technical courses weekly, assisting 4-10 students in programming, web development, cybersecurity, and UI/UX design, focusing on practical coding skills and problem-solving

- Set up course environments including VS Code, Figma, Git/GitHub, XAMPP, and more, integrate technical resources, mentor new lab aides on instructional tools and workflows
- Provided personalized tutoring in programming a variety of languages, full-stack web development, and CompTIA certifications (A+, Network+, Security+)
- Maintain lab equipment and classroom technology to ensure seamless day-to-day operations.
- Assisted for a few months in teaching Basic Technology for refugee students, focusing on hardware, Microsoft applications, typing skills, and ESL-supported digital literacy

Service & Leadership

Salt Lake Community College Programming Club President/Vice President, SLC, UT, *Aug 20XX – May 20XX*
Let weekly meetings and manage a Discord server to support student collaboration

- Planned and facilitated programming challenges, tech panel, and student showcases
- Collaborated with club leadership bi-weekly to organize events to support student development

NAME

City, St
Phone

Data Scientist with experience in machine learning (ML) statistical analysis, database design and active security clearance. Proficient in data analysis and data engineering. Adept at collaborating with stakeholders to data-driven decisions and improve operational efficiency.

SKILLS

- Machine Learning
- Data Analysis
- Data Engineering
- Database Design
- MLOps
- Agile Process
- Advanced Algorithms
- Parallel Programming
- Amazon Web Services

LANGUAGES

- SQL
- Neo4J
- MongoDB
- PowerBI
- Tableau
- Python
- R
- C#

PROFESSIONAL EXPERIENCE

Associate Data Scientist, *Northrop Grumman, Roy, UT* *DATES*

- Lead developer of supply chain app, automating the shipping process. Working with customer and program manager to design streamlined data ingestion forms and workflows. Designing and implementing dashboards to display KPIs.
- Conduct comprehensive trade study to evaluate effectiveness of commercial software product from the perspective of a data scientists, leading to companywide consideration for adoption
- Engage with data consumers to facilitate data access with 2 CI/CD and ETL pipelines utilizing AWS to enable effective dashboard creation and data utilization.
- Assess and demo capabilities of 2 MLOps software options to empower leadership to make informed decisions.

County Emissions Fraud Detection, *NCAST, Ogden, UT* DATES

- Collaborated with 2 subject matter experts to identify methods for detecting fraud, enhancing the project's solution.
- Executed data wrangling, analysis, and machine learning process to identify fraudulent behavior in emissions data.
- Presented findings to Salt Lake County officials with suggestions to improve data capture and methods of detecting fraud.

Intern Data Scientist, *Northrop Grumman, Roy, UT* *DATES*

- Researched pruning and traversal algorithms for the development of a heuristic that optimized network traversal to create a map, reducing logistics costs.
- Conducted statistical tests to evaluate heuristics, enabling the selection of the optimal heuristic.
- Presented findings and participated in agile and stakeholder meetings, facilitating team collaboration and informed decision-making.

Intern Tech. Systems Engineer, *Northrop Grumman, Roy, UT* *DATES*

- Implemented new features and established new SharePoint sites, improving data capture and enhancing feature utilization for user teams.
- Investigated and resolved from users across the division, ensuring a seamless user experience.
- Led agile meetings as Scrum Master for one month on a rotational basis, presenting solutions to stakeholders and better achieve sprint goals.
